

FindMeCure Foundation

Contributing to a healthier world through
innovation and education

Become a partner!

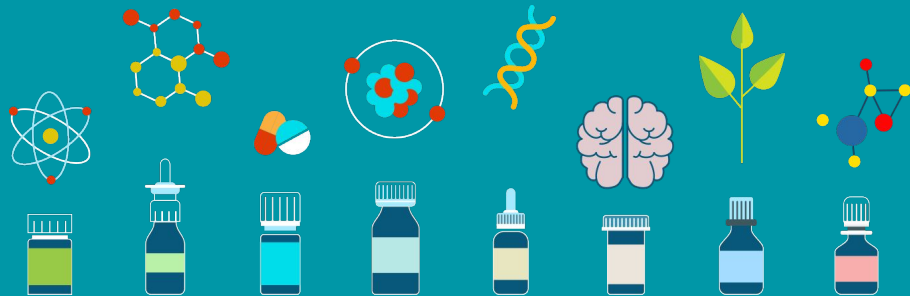

What challenges are patients facing?

- Increasing morbidity and mortality rates in various diseases
- Lack of easy-to-understand information regarding promising treatment options
- Low participation of patients in research
- Gap between the pharmaceutical development and patients
- Low education level leading to poor health
- Financial burden

Meanwhile

Science is constantly working on finding better solutions within clinical trials

From prevention to treatment

However

Less than 15% of patients are aware about clinical trials being a treatment option

75% of the patients say they would apply for trials had they known it is possible

**Source: NIH, CSRP*

FindMeCure Foundation

Supporting patients in finding suitable clinical trials and guiding them through the application process

Raising awareness and improving the overall understanding about clinical trials being a treatment option
